

Dear Military Tools for ArcGIS User:

Esri is pleased to provide you with Military Tools for ArcGIS® 2.0. This media contains everything necessary to install and configure Military Tools for ArcGIS.

Military Tools for ArcGIS is a collection of add-ins, geoprocessing toolboxes, and widgets for ArcGIS. They are fundamental tools for coordinate conversion, distance and direction calculations, visibility analysis, and the creation of military symbols.

Military Tools for ArcGIS 2.0 supports the following products:

- ArcMap™ 10.3.1, 10.4, 10.4.1, 10.5, and 10.5.1
- ArcGIS Pro 1.4, 1.4.1, and 2.0
- Web AppBuilder for ArcGIS (Developer Edition) 2.3 and 2.4

Installation Instructions

Locate the folder of the ArcGIS application you use. This will be either ArcMap, ArcGIS Pro, or Web AppBuilder for ArcGIS (Developer Edition). The specific application folder contains either add-ins, geoprocessing tools, or widgets to install, as well as a Resources folder that contains a .pdf with specific instructions to install the pieces you are interested in.

Getting Support

For all your Esri® software support needs, please visit support.esri.com/en/phoneSupport.
